ASSETS USED

ACCOUNT ICON

Description

The account icon is used within the settings menu as a design feature. It is placed next to 'edit profile' text to show the user that they can edit their profile. It is easy to see and understand in the app's interface as it clearly contrasts.

Date Retrieved: **29/01/2024**.

AIR QUALITY IMAGE

Description

The air quality image is used on the home screen as a design feature. It is purely decorative as I have placed it under the 'air quality' heading.

Date Retrieved: **29/01/2024**.

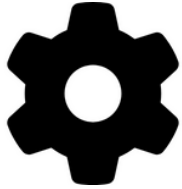

WEATHER WARNING IMAGE

Description

The weather warning image is used on the home page of the app also as a design feature. It is used just as decoration as it is placed under the 'weather warnings' heading.

BLACK SETTINGS ICON

Description

The black settings icon is used on the weather forecast and map pages. It is used because it contrasts well with the greyish background. This makes it easy for the user to see it – as well as it being easy to understand due to it being used universally as a settings icon. It is user interactable as it can be clicked on to navigate the user to the settings page of the app, closing the previous page.

Date Retrieved: **29/01/2024**.

WHITE SETTINGS ICON

Description

The white settings icon is used in the same way as its black counterpart. It is used on the home screen to contrast with the black header background, making it easy for the user to see. It is user interactable as it can be clicked on to navigate the user to the settings page of the app, closing the home screen.

Date Retrieved: **29/01/2024**.

HOME ICON

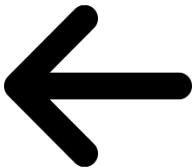

Description

The home icon is used on many pages as it is placed in the footer as a button to allow the user to get back to the app's homepage. It is user interactable as it can be clicked on to navigate the user back to the homepage. The icon is easy to understand for the user as it is used universally in the design of applications. The color of the home icon is used to clearly contrast with the white background of the app's footer, so it can easily be seen.

Date Retrieved: **29/01/2024**.

LEFT ARROW ICON

Description

The left arrow icon is used on many pages to allow the user to navigate back to their previous page. It is user interactable as it can be clicked on. The color of the left arrow icon is used to clearly contrast with the background of the edit profile page – to make it easy for the user to view.

Date Retrieved: **30/01/2024**.

RIGHT ARROW ICON

Description

The right arrow icon is used on the homepage as a method of submitting a user-inputted location. It is user interactable as it can be clicked on. If a location is submitted, it navigates the user to the weather forecast page for the location that they have entered. The color of the right arrow icon is used to clearly contrast with the white text box it is placed inside – to make it easy for the user to view.

Date Retrieved: **30/01/2024**.

WEATHER ICON

Description

The weather icon is also used on the app's footer as a method of navigating the user. The user can interact with it by clicking on it, which then navigates them to the weather forecast page on the app. The color of the weather icon is used to clearly contrast with the white background of the app's footer.

Date Retrieved: **30/01/2024**.

WEATHER ADVICE GROUP LOGO

Description

This image is used as the logo and icon for the app. The logo/icon is suitable for the premise of a weather app and its black and white color scheme has clear contrast so it can be seen easily by the user. The logo/icon has also been designed like this so that it can be seen regardless of whether the user is using light or dark mode on their devices.

Date Retrieved: **06/02/2024**.

TEMPERATURE ICON

Description

This image is used in the weather forecast page. It is placed next to a text box that displays the temperature of the user's location. The color of the image clearly contrasts with the white background of the weather forecast page so it can easily be viewed by the user. It is also a universally used icon in applications to represent temperature so it can be easily understood by the user.

Date Retrieved: **07/02/2024**.

AIR QUALITY INDEX ICON

Description

This image is used in the weather forecast page. It is placed next to a text box that displays the air quality index of the user's location. The color of the image clearly contrasts with the white background of the weather forecast page so it can easily be viewed by the user.

Date Retrieved: **07/02/2024**.
